HOW TO USE AI IN LEARNING AND EDUCATION

REIMAGINE HOW YOU WORK, LEARN AND EDUCATE WITH AI

QUANTUMRISE Talent Group

We find that many tutors, trainers and teachers are reluctant to use AI tools to enhance their work.

Or they are limiting themselves to content creation as the obvious benefit.

AI is reshaping the world of education and learning. From planning lessons to using AI as a thought partner and digital colleague, it's changing how we design and deliver learning experiences.

This practical programme is ideal for those designing and delivering learning, training, education and assessment. It gives space to explore, experiment and build confidence so you can harness AI with purpose.

UNLOCK THE POTENTIAL OF AI IN LEARNING AND EDUCATION

By the end of the programme, you'll gain the benefits of using AI by:

1

Boosting your productivity
Use AI to speed up content creation, simplify admin, and support planning.

2

Sharpening up your critical thinking
Learn how to use AI to refine your ideas, evaluate your work, and challenge your own assumptions.

3

Creating more confidence
Move beyond the obvious and experiment with fresh, innovative ways to apply AI every day.

You'll have practical tools, a confident mindset, and a clearer idea of what's possible.

module 1

CONTENT CREATION

SET THE FOUNDATION

This module is all about building confidence, curiosity, and capability. You'll:

- Reflect on your mindset around AI and uncover its potential in your role.
- Discover how AI can support idea generation, planning, and productivity.
- Learn a simple, effective framework to get better, faster results from tools like ChatGPT and Microsoft Copilot.
- Practise designing real content, objectives, sessions, and resources with AI as your own assistant and digital colleague.

module 2

GET CREATIVE

QUANTUMRISE
Talent Group

TIME TO THINK BIGGER

This module will stretch your imagination and inspire new ways of working. You'll:

- Explore creative use cases for AI across the learning lifecycle.
- Use ChatGPT or Microsoft Copilot to enhance, critique, and adapt existing content.
- Turn data into action with AI powered evaluation summaries.
- Experiment with generating visuals that bring your learning to life.

“Hayley delivered this AI training for us and we all came away buzzing and more importantly there are lots of examples of team members applying that learning already.

We highly recommend this programme.”

NICHOLAS JOHNSTON, CHIEF EXECUTIVE,
EDUCATION COMPETENCIES CONSORTIUM

ECC Educational Competencies Consortium Limited.

“A huge thanks to you for the training that you delivered to the Team this week on AI.

Everyone thoroughly enjoyed the sessions and really appreciated the practical and non-techy approach to the topic.

And I’ve already seen it being put into action to accomplish a few tasks that we’ve been battling with for a while.”
