AI IS NOT ABOUT TECH

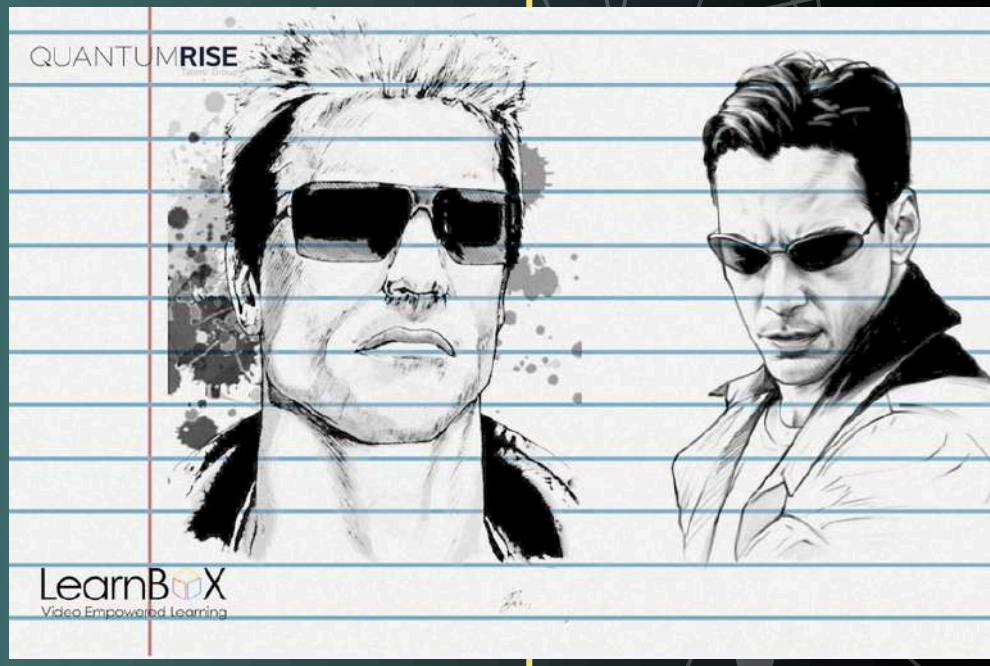

IT'S ABOUT PEOPLE, CHANGE, SKILLS AND EMOTIONS

We grew up with The Terminator franchise, where Skynet becomes self-aware and builds terminators to eradicate the human race.

Or in The Matrix Trilogy when the machine world drives the last, remaining humans to Zion for their last stand.

These examples ALWAYS come up as people have a genuine fear. It is not a fear of Judgment Day coming, but it's certainly a fear of the implications of AI.

And that's because people do not know enough about it. And when we don't know enough about things, we fill in the gaps and generally lead with emotion, not logic. We default to fight or flight, and it takes more effort to feel OK about things.

HOW ARE YOU ENGAGING YOUR PEOPLE IN GENERATIVE AI?
